

## Setting up Application Environment

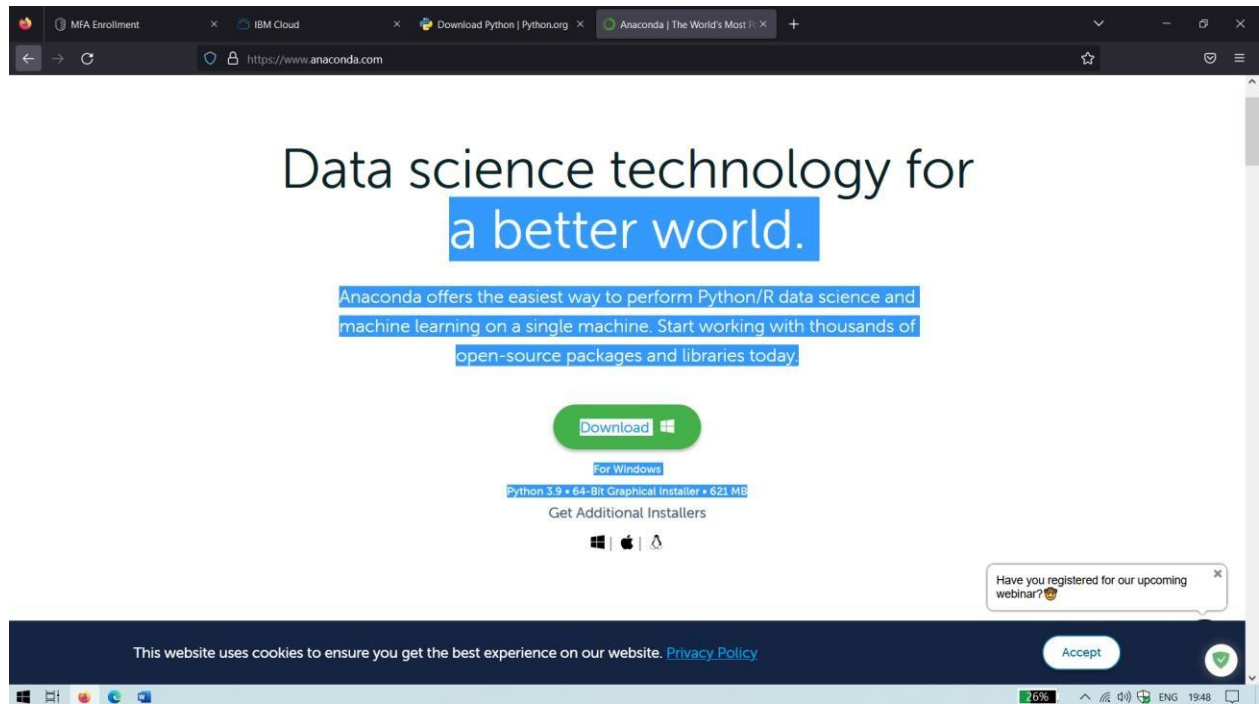

### Create Flask Project

Date	10 October 2022
Team ID	PNT2022TMID06051
Project Name	Skill/Job Recommender Application

#### Step 1. Install Python latest version from python.org

#### Step 2. Download Anaconda from <https://www.anaconda.com/> and install it by running the .exe file

### Step 3. Install Flask using command pip install flask

```
Microsoft Windows [Version 10.0.22000.1998]

WARNING: Ignoring invalid distribution - (c:\python310\lib\site-packages)
WARNING: You are using pip version 22.0.4; however, version 22.3 is available.
You should consider upgrading via the 'C:\Python310\python.exe -m pip install --upgrade pip' command.

C:\Users\Vaishnavi>
```

**Step 4.** Open a new Python file and start coding

```
from flask import Flask
app = Flask(__name__)
@app.route('/')
def hello():
    return "Hello World"
if __name__ == '__main__':
    app.run(debug=True)
```

**Step 5.** Run the Python file using command `python filename.py`A screenshot of a Windows Command Prompt window titled "Command Prompt - python app.py". The window shows the execution of a Python script using the Flask framework. The user navigates to the directory "c:\Users\Vaishnavi\IBM-Project-23327-1659878210" and runs the command "python app.py". The output shows that the Flask app is running in debug mode on http://127.0.0.1:5000. It includes a warning about using a development server and instructions to use a production WSGI server. The output also shows the app restarting with stat and the debugger being active. Finally, it displays two GET requests: one for "/" returning 200 and another for "/favicon.ico" returning 404.

```
C:\Users\Vaishnavi>cd c:\Users\Vaishnavi\IBM-Project-23327-1659878210
C:\Users\Vaishnavi\IBM-Project-23327-1659878210>python app.py
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
* Debugger is active!
* Debugger PIN: 858-848-661
127.0.0.1 - - [29/Oct/2022 22:00:18] "GET / HTTP/1.1" 200 -
127.0.0.1 - - [29/Oct/2022 22:00:18] "GET /favicon.ico HTTP/1.1" 404 -
```

## Step 6: Open the Ip in browser
